

## Ideation Phase Empathize & Discover

Date	26 September 2022
Team ID	PNT2022TMID06728
Project Name	Project – Containment Zone Alerting Application
Maximum Marks	4 Marks

### Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

### Containment Zone Alerting Application

The containment application is intended to provide information about containment zones in a particular region by alerting people, through continuous monitoring of an individual's location. Key benefits of the application are monitoring people's activity and alerting them of their safety movements.
