#### Customer Problem Statement Template:

Could Application Development - Containment Zone Alerting Application

A problem statement is a concise description of an issue to be addressed or a condition to be improved upon. The problem statement identifies the current state, the desired state of a process.

This application is intended to provide information about containment zones in a particular region by alerting people, through continuous monitoring of an individual's location. Key benefits of the application are monitoring people's activity and alerting them of their safety movements.

1	I AM	Contributor / Developer
2	I'AM TRYING TO	Detect the Containment Zone in the world in a short duration time. And convey the alert message to the people
3	BUT	People may consider this type of message as fake and bother this type of message
4	BECAUSE	Who spread the rumors in the society within a Seconds. Where everyone shares the fakes alert message to the others in the society.
5	WHICH MAKES ME FEEL	Now a day Containment Zone is increased, so the people get ready to awareness in the Society. My Project help to get rid of the problems.
